Professional Summary

Business and risk analytics professional with 4+ years of experience across insurance and data-driven operations. Experienced in analyzing complex business problems, improving processes, and translating business needs into practical solutions through cross-functional collaboration, data analysis, and technology enablement.

Education

Quinnipiac University — MS. Applied AI & Business Analytics | Expected Fall 2026
National University of Science and Technology — BS. Risk Management & Insurance | Nov 2022

Relevant Experience

Fundraising Data & Reporting Analyst Intern Jun 2026 – Aug 2026
The Salvation Army – Southern New England Division | Hartford, CT
- Maintained 500+ donor and gift records in Salesforce and Raiser's Edge, supporting reconciliation, reporting, and audit-ready recordkeeping.
- Partnered with IT to integrate donor data into Power BI and Excel reporting workflows, improving leadership visibility into giving and reconciliation.

Research Assistant Apr 2025 – May 2026
Quinnipiac University, Office of Institutional Research & Assessment | Hamden, CT
- Generated and audited Informer extracts for IPEDS, NSLDS, and Financial Value Transparency reporting, supporting federal submissions and compliance documentation.
- Validated enrollment, academic, and financial aid data for 9,200+ students in Ellucian Colleague to support institutional dashboards and official reporting.

Client Solutions Specialist Jan 2023 – Dec 2024
Zimbabwe Insurance Brokers | Harare, Zimbabwe
- Analyzed risk profiles, exposure data, and claims history for 600+ clients to support coverage, pricing, and insurer and reinsurer negotiations.
- Used Salesforce and HubSpot to track prospects and build pipeline dashboards, supporting approximately 60% conversion of engaged prospects and $200K in forecasted revenue.

Claims Analyst Nov 2020 – Dec 2022
First Mutual Holdings | Harare, Zimbabwe
- Analyzed motor, liability, and property claims for 13 corporate and 250+ individual clients, identifying subrogation opportunities that supported approximately $40K in recoveries.
- Built Power BI reporting from SAP and Excel data on claims cycle time, loss ratios, reserve adequacy, and adjuster performance for cross-functional review.

Academic Projects and Research

Aegis P&C Intelligence Platform
- Designed an integrated architecture spanning underwriting, pricing, expected loss, claims, and risk controls, connecting business capabilities and decision logic to measurable portfolio outcomes. Built with Python, Excel, Next.js, GitHub and PostgreSQL, with AI tools supporting development.

Aegis Evidence Studio
- Designed audit-ready evidence architecture linking underwriting decisions, business rules, cloud controls, and policy-as-code to frameworks including NIST, ISO, SOC 2, SOX, HIPAA, GDPR, and COBIT.

Technical Skills

Analytics and BI: SQL, Power BI (DAX, Power Query, data modeling), Excel, SAP BusinessObjects, SAP BW, SPSS
Programming and Automation: Python, Power Automate, Cloud Custodian, Linux
Business Systems: Salesforce, HubSpot, Raiser's Edge, Ellucian Colleague, Informer

Additional Experience

UPS — Package Delivery Driver | Sep 2026–Present; AutoZone — Part Sales Associate/Driver | Apr–Aug 2026; Walmart — Electronic Sales Associate | Jul 2025–Mar 2026
