Professional Summary

Risk and insurance analytics professional with 4+ years of experience across underwriting, claims, and data-driven operations. Skilled in analyzing complex risk and exposure data to support pricing, coverage, and portfolio decisions, with applied AI and machine learning experience in insurance underwriting contexts.

Skills

Insurance & Risk: Underwriting, Claims, Pricing, Loss Ratios, Reserving, Risk Scoring
Data Analysis & Modeling: Data Interpretation, Trend Analysis, Retention Analysis, Forecasting Support
Databases: SQL, Power Query, ETL, Relational Databases
Programming & BI Tools: Excel, Python, Tableau, Power BI, PowerShell, SAP BW, SPSS, Generative AI
Governance & Compliance: Model Governance, Audit Evidence, Policy-as-Code (Cloud Custodian), NIST, SOC 2

Relevant Experience

Fundraising Data & Reporting Analyst Intern Jun 2026 – Aug 2026
The Salvation Army – Southern New England Division Hartford, CT
• Managed end-to-end donor data and gift reconciliation across Salesforce and Raiser's Edge, collaborated with IT in a project to transform donor data into automated reporting workflows, enabling leadership to monitor giving trends, reconciliation status, and fundraising performance.

Research Assistant Apr 2025 – May 2026
Quinnipiac University, Office of Institutional Research & Assessment Hamden, CT
• Performed data validation, retention analysis, and regulatory reporting using Ellucian Colleague and Informer, auditing enrollment, academic, financial-aid, housing, and demographic data for institutional dashboards and federal IPEDS, NSLDS, and FVT/GE submissions.

Client Services Associate Nov 2023 – Dec 2024
Zimnat Harare, Zimbabwe
• Processed policyholder renewals and endorsements, maintaining accurate account records and resolving documentation gaps to ensure timely policy updates.

Underwriting Assistant Jan 2023 – Oct 2023
Zimnat Harare, Zimbabwe
• Analyzed client risk profiles, exposure data, and claims histories using a broker management system (BMS) to support underwriting reviews and inform pricing and coverage recommendations.

Claims Analyst Jul 2022 – Dec 2022
First Mutual Holdings Harare, Zimbabwe
• Analyzed claims across multiple P&C portfolios using SSP Pure Insurance and Excel, identifying trends in cycle time, loss ratios, reserve adequacy, and overall claims performance.

Claims Professional Development Program - Internship Sep 2020 – Aug 2021
First Mutual Holdings Harare, Zimbabwe
• Supported multi-party auto claims investigations by reviewing policy coverage, police reports, driver and witness statements, and vehicle damage to help assess liability.
• Assisted with rental and repair coordination, total loss paperwork, and customer updates throughout the claims process

Academic Projects & Research

• Designed an integrated architecture spanning underwriting, pricing, expected loss, claims, and risk controls, connecting business capabilities and decision logic to measurable portfolio outcomes.
• Designed audit-ready evidence studio linking underwriting decisions, business rules, cloud controls, and policy-as-code to frameworks including NIST, ISO, SOC 2, SOX, HIPAA, GDPR, and COBIT.

Master's Thesis: Balancing Predictive Performance and Explainability in Insurance Underwriting
• Comparing traditional statistical and machine-learning underwriting models to evaluate predictive performance, calibration, fairness and interpretability.

Education

Quinnipiac University — MS. Applied AI & Business Analytics | Dec 2026
National University of Science and Technology — BS. Risk Management & Insurance | May 2022
